SKILLS

JavaScript, React, TypeScript, React Native	Node.JS, Ruby on Rails, Go
Core Java, Android App Development	Docker, Kubernetes, Google Cloud

WORK EXPERIENCE

Software Dev Engineer II *Swiggy* *May 2021 – Current*

- Currently working with the Portal Team.

Software Development Engineer II *HackerRank* *Jan 2020 – May 2021*
Software Development Engineer I *Jan 2019 – Jan 2020*

- **Responsible for** the Theia **IDE improvements** for achieving overall better user experience and performance.
- Responsible **for integrating Projects Question** to Codepair/Interview.
- Implement **Screen Share feature using WebRTC from scratch.**
- Responsible **for integrating Projects Question** to Candidate Site which **improved** the overall **rating to 4+** (out of 5).
- **Setup** Helm based deployment, **alerting** policies and Disaster Recovery for one of our Internal Node.JS Micro-service which **led to faster response time** in case of production issues.
- **Developed Skills evaluation flow's frontend** in React **& backend** in Ruby on Rails **from scratch** to improve the report experience and serve as a data point for internal Skills Platform.
- Aided in migration to the **new Theia IDE** from Eclipse Che which in-turn **improved the experience and performance** for candidates.
- **Explored** various **open-source projects** in different languages to build Proof of Concept and **validate business needs.**
- **Built** various **dashboard** using the feedback data and used the information **to improve the UI & UX**.
- **Incorporated tracking** using Google Analytics 360 and **guided other teams** to achieve the same.

Software Engineer *CodeBrahma Technologies* *Mar 2018 – Jan 2019*

- **Responsible for** handling all the **frontend** (react) requirements for the Mentor HQ project.
- **Built** complex & **reusable UIs/Components** using React.JS and 3rd party libraries.
- **Developed Single-Codebase web & mobile apps** using React JS for Web & React Native for Android and iOS.
- **Developed the react native** codebase of Open Sourced React Native Restaurant project.

Assistant Systems Engineer *Tata Consultancy Services* *Feb 2017 – Mar 2018*

- **Developed PM** (Presentation model) & **PR** (Physical Renderer) files to implement various business requirements.
- **Developed Siebel workflows** to add new features and functionality to the Landline connection creation.
- **Built** various functional **features** on Oracle Siebel CRM software **for** a **client in the telecommunication** sector.
- **Created** and maintained **Unit Test Results reports** for testing the new requirements and to ensure smooth deployment process.

- **Facilitated the deployment process** by conducting various sanity tests (New Connection, Add VAS, etc.) in the production environment to ensure smooth business flow.

Freelance Developer & Own Projects

- Built various websites using PHP & MySQL and Static websites using React.JS.
- Created Native Android App using Java/Kotlin and Hybrid apps using React Native.
- Built PWAs in React.
- Built own version of App Store as an Android app.
- Built an Android app for converting portrait or landscape images to square images.

PROJECTS

All Public Projects are available at my **GitHub** profile.

EDUCATION

Bachelor of Technology (Information Technology)

College of Technology & Engineering, Udaipur 2012-16
